I do not feel as a citizen of the United States that the full scope of this compromise has been disseminated to the people who it affects the most. Please do not allow politics to determine the future course of technological advance in the US. Do to MSFT what was done to the sugar companies and the oil companies and steel. Destroy the anti-competitive force that is MSFT and we will once again be the vanguard of technological break through's not patches and security holes.

Thank You for your consideration  
Ari Miller
